SpeedTrack, Inc.

Business Intelligence Interactive Dashboard

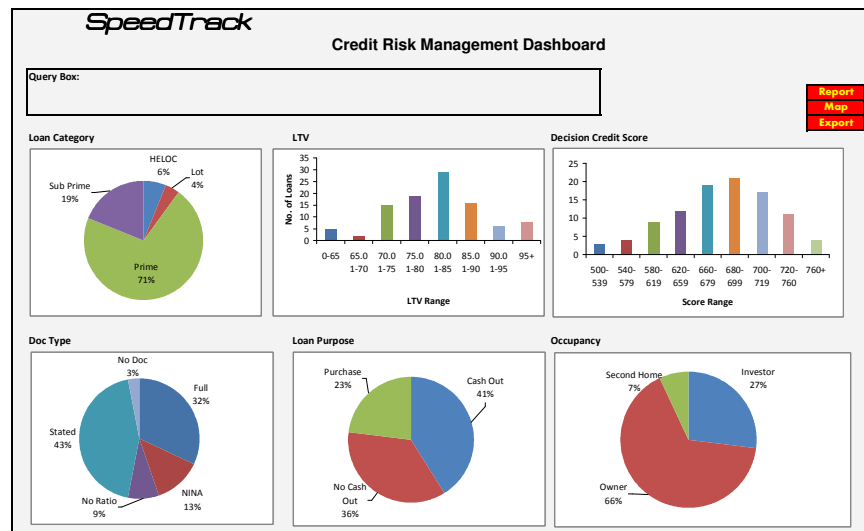

“We spent millions on software, hardware and people to create a system that few people in the organization could use, and was not able to provide the answers we needed. With SpeedTrack, we finally have a technology that is cost effective, usable and useful!”

Joy Schaefer, Veteran CEO of public companies

-  **Do you have tons of data, but still can't find the information you need?**
-  **Would you like to see everything in one location?**
-  **Does spending less time and money sound good to you?**

With SpeedTrack's Business Intelligence – Interactive Dashboards you will:

-  Gain greater awareness, control and accuracy of your data
-  Be able to answer questions without having to get help from IT
-  Have the ability to create custom views for each level of end user
-  Quickly run comparative analytics on the entire range of information thru a single interface

Using your mouse to select information of interest, the Dynamic Dashboard instantly adjusts to show the relationships across all categories of your information. For example, by clicking on the “Sub-Prime” slice of the Loan Category pie chart, all other categories of information instantly adjust to show their relationship with the “Sub-Prime” portion of the portfolio. Each successive selection (e.g. “Cash Out” in the Loan Purpose category) adjusts the remaining categories to reveal their relationship. This allows you to quickly and easily explore your data to make insightful discoveries, and generate reports, maps, or export to other systems (Excel, Access, CSV, etc.).

For a quick demo on how you can unlock the secrets buried in your data, give us a call or send an email to info@speedtrack.com
