Legacy Data System Retirement

“We cut the cost of managing our legacy data by more than 50% using SpeedTrack.”

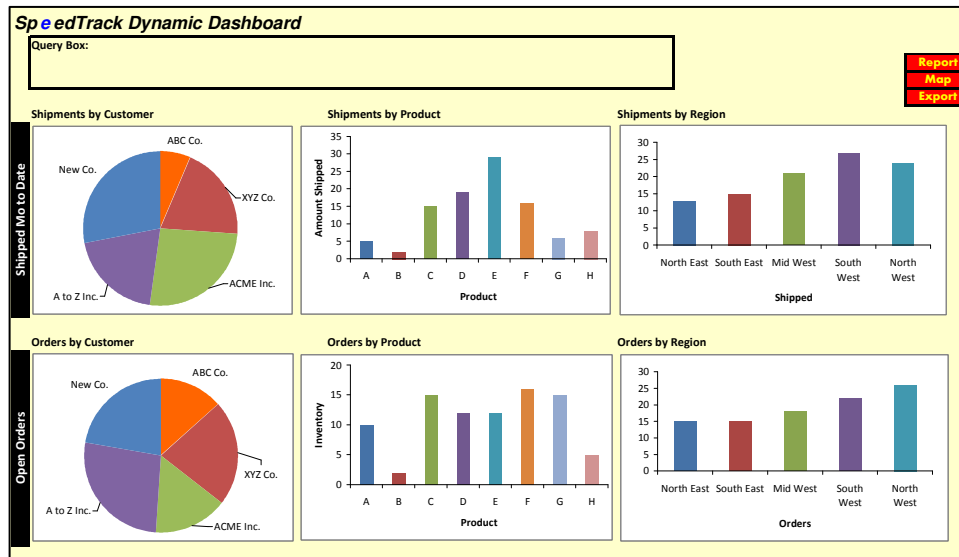

*IT Director, Regional Police Agency,
Ontario, Canada*

With Legacy Retirement Solution, LRS by SpeedTrack, data exports are seamlessly performed through a single interface, significantly reducing your costs for maintaining that legacy data, reducing the load on your IT staff, replicating your data, and customizing your reports.

Legacy Retirement Solution Key Features

- Costs significantly less than maintaining your legacy system
- Create standardized and ad-hoc queries through a single interface
- No end user programming required
- Restrict access based on user profiles

The visually compelling, interactive dashboard puts the power into your hands, giving you the ability to quickly see your information. With one click, you can change the way you view your information, giving you the flexibility to see trends and relationships. Completely customizable dashboards are designed to meet your specific needs and preferences.
